To Whom It May Concern:

We are writing to highly recommend Codein team as a General contractor. We are a fast growing start-up and we are currently cooperating with Codein in development of the client side of our mobile application for the IOS and Android platforms. Our project is still in development phase and we are continuing development of new features.

After we have changed a few of developers teams, we find out the team we needed and it happened to be Codein.

“World of Crew” is a project dedicated to be a single stop shop of information about discounts available for airline crews worldwide. This service needs very correct and fast client application work, precise tracking of client preferences and user behavior statistics collection. It needs also seamless and continuous client's interaction in order to amplify clients satisfaction and project revenue.

I am confident that folks at Codein will be excellent members of your development team and you will be satisfied with their work. If you have any questions or would like an additional information, please feel free to contact me.

Sincerely yours, Florian Ughetto  
Founder of “World of Crew”
